

YKK
Little Parts. Big Difference.®

FLATKNIT[®]

*Thinner, Lighter, and
Softer than Ever*

Thinner, Lighter, and Softer than Ever

As advanced technology makes the fabric more flexible, YKK developed thinner, lighter, and more flexible knitted zipper to match the market demand.

Plastic top / bottom stops creates consistent color matching for better and more attractive design of your garment.

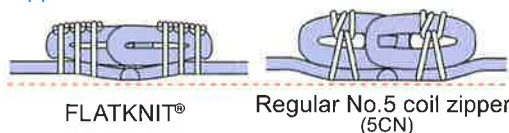

FLATKNIT®

More than 20% Thinner and 30% Lighter

Compare to regular No.5 coil zipper (5CN), FLATKNIT® (5FK) realized 20% thinner chain thickness and 30% lighter weight. (When using plastic sliders)

※Comparison to the regular 5CN (in 50cm/20inch length)

Zipper Chain Cross Section

Color Matching with Plastic Parts

YKK made it possible to match all the zipper parts to the tape colors by using plastic top / bottom stop and open parts.

Recommended Application

RTW, Kids wear, Sportswear, Outerwear, etc.

Item Code

SIZE	CHAIN TYPE	CLASSIFICATION	TAPE
5	FK	Close / Open	BP15

Sophisticated Draping Characteristic

YKK's original knitted tape technology makes the desirable silhouette for your garment. FLATKNIT® is twice as soft as regular zippers and is suitable for your thin and delicate fabric.

Lighter with Plastic Slider

FLATKNIT® uses plastic sliders as its standard, to give high grade look and feel to your design. Its beautiful look lasts longer, as plastic slider is more resistant to paint chipping.

<Caution>

- For dry cleaning, petroleum based solvent is recommended. Do not use Chlorine based solvent.
- Proper ironing temperature is 80-120°C (175°F - 250°F), especially for the plastic top/bottom stop parts.
